

## **Name of the Department: Department of Conservative Dentistry**

**Vision:** To be internationally recognized as a leader in education, research, patient care and service.

**Mission:** To be known for innovative dental education, commitment to cultural diversity, discovery, transfer of scientific knowledge, the superior skills of our graduates and the highest degree of patient care and service.

### **Department Introduction:**

The Department provides conservative care to preserve teeth damaged from various causes (e.g. caries, trauma, etc.) rather than extracting teeth. The department conducts various researches and treatments including esthetic & conservative restoration, root canal treatment, tooth bleaching, apical surgery with dental microscope, tooth transplantation, and replantation for rehabilitation of original tooth anatomy and oral function, using state of the art methods such as LASERS(soft and hard tissue) which will enhance the general health and welfare of our patients.

### **Values and ethics:**

These values and ethics help the department achieve its vision and mission:

- Excellence
- Integrity
- Collaboration

- Courtesy
- Compassion
- Diversity
- Professionalism

### **HOD's desk:**

This department of is considered the heart and soul of dentistry. The department was established in 2001 and has been flourishing ever since and has created a benchmark in the field of education. Conservative Dentistry is the branch of dentistry which is concerned with the conservation of teeth and embraces the practice of operative dentistry and endodontics. One of the major highlight of the department is that emphasis is laid upon quality work, ethics, values and students imbibing maximum knowledge making them at par with the latest developments innovations in the field of operative dentistry and endodontics to survive in the highly competitive world. The various services offered in the department are at par; if not better than international standards.
