

On 7th of November 2022 National cancer awareness day was celebrated by department of Oral Medicine and Radiology. The screening counter was setup in foyer and approximately 300 number of patients were screened for tobacco (smokeless and smoked form) induced oral mucosal lesions and were counselled about the tobacco -cessation and its deleterious effects on mucosa by the interns posted in department and in tobacco cessation unit. The patients were educated the different types of lesions caused by tobacco usage and were encouraged for stoppage of the habit. The awareness programmed was actively participated by principal madam Ramandeep Dugal, Registrar Mr. A Shaikh and faculties of other departments.
